Subject: Suggestions for revision of Syllabus-reg.

Respected Sir,

I hope this letter finds you in good health and high spirits. I am writing this to convey some suggestions regarding the syllabus for the **M.Sc. Ag) Agronomy** program, as discussed during recent faculty feedback sessions. The feedback highlights opportunities to improve the curriculum to align it more effectively with current academic and practical demands.

1. Inclusion of Research Methodology and Research Ethics: It is recommended to introduce an additional subject focussing on **Research Methodology and Research Ethics**. This will help students gain essential skills in conducting systematic and ethical research, preparing them for advanced studies and professional roles in agriculture. Emphasizing research design, data analysis, ethical considerations, and scientific communication will enhance the quality of student research projects.

2. Climate Change in Agro meteorology: The faculty has suggested that **Agro meteorology related topics** be expanded to highlight **climate change issues** and their **impact on crop production**. As climate change increasingly affects global agriculture, it is crucial that students understand its implications for crop yield, water management, and sustainable farming practices.

We believe these changes will significantly strengthen the curriculum and ensure that students are well-equipped to address emerging challenges in agriculture. It is kindly requested to consider these recommendations for incorporation in the next revision of syllabus.

Looking forward to your positive response.

With high regards

Yours faithfully

Principal
